Prologue

We present to you, an enduring range of furniture concepts for contemporary houses located at different locations. This furniture combined together with exclusive Hettich's fittings ensure you the utmost reviving experience. The neutral color palette adds elegance and warmth thus transforming houses into homes.

This hypothetical architecture project showcases exciting furniture ideas for four Contemporary Homes types.

1. Hill Station	06
2. Country Side	22
3. City Centre	38
4. Coastal Area	54

ABOUT US

Hettich Forum, Kirchlingern, Germany

Hettich Manufacturing Plant, Indore, India

Hettich Manufacturing Plant, Vadodra, India

The company's origins date back to 1888 when Karl Hettich began making the new clock component he had invented. By 1930, his descendants had diversified into furniture fittings, setting up production in East Westphalia – a Centre of the German furniture industry.

Today, Hettich's, still family-owned, has become an industry leader with a worldwide reputation. We're one of the world's largest manufacturers of high-quality furniture fittings, with over 6,000 employees in more than 100 countries. The company's success has been built on four enduring values: quality, innovation, close cooperation with customers, and absolute reliability. We work to inspire our customers with our ideas and our passion.

poised and perfect.”*

HILL STATION

For many, perhaps the duplex house has been the luxury house, and not only that but one of the self-managed spaces. In this house, we are going to explore the relationship between the house and the user, how these two elements create a dialogue. In this hypothetical artistic representation, the house not only explores the aesthetics of architecture but the very basic need of humans, that is space. The large glass skylight which seamlessly looks to the sky gives a special character of visual lightness and strength to the house. The subtle yet loud noise of white makes space come to life!

COUNTRY SIDE

The countryside is where radical changes are! This Duplex House highlights the fact that bigger isn't always better. With great design and innovative thinking, small-scale architecture could change how this and the next generation view dwellings. An off-grid modular structure that can accommodate exemplary young rural dwellers who are more complex than expected: both a keen thinker and nature lover, who will not only enjoy the spatial organization but the unique aesthetics followed based on newer technologies and sustainable materials like green concrete.

“*Designed to
be distinctive.*”

COASTAL AREA

Striking abstraction comes with freedom and exploration of self, and this hypothetical architecture speaks volume of it. Elongated distribution of the space gives a broader approach to experiment with various possibilities of activities. It provides a well-ventilated approach to the interior by the tall high-rise windows conjoined with the exterior. This single-family home is designed to be distinctive and to make a statement. While it's not intended for the timid of nature, it is for those comfortable making a statement with their home and want to be part of a vibrant and exciting neighborhood.
